The COVID pandemic was traumatizing for many people for so many reasons: illness, of course, loneliness due to lockdowns, ruined businesses, [learning and developmental loss for kids](#), and much, much more.

But of all the failed, [draconian governmental responses](#), the mRNA [vaccine mandates](#) arguably caused the most harm—feuding families were destroyed, [friendships ruined](#), and millions either bent the knee and unwillingly got a shot or [got fired](#). Meanwhile, an untold number experienced significant [health issues](#) from the untested technology.

Despite all this, the Biden administration pushed the jobs relentlessly and endlessly waxed poetic about the magic of mRNA, which they claimed would pull the nation out of the crisis. Biden and his flunkies condemned any American who questioned the narrative and insisted that you would not get the virus if you got the vax and that a “[pandemic of the unvaccinated](#)” was to blame for our inability to eradicate it.

The only problem with all this: it wasn't true—and *they knew it*.

Emails obtained through a Freedom of Information Act request (FOIA) show that then CDC Director Rochelle Walensky and former NIH Director Francis Collins discussed “breakthrough cases” of COVID in January

ready to the public:

Stunning FOIA revelation! Three quick items:

1. [@CDCgov](#) director Walensky knew about vax "breakthrough" infections in January 2021. So did Fauci.
2. They continued to push vax mandates anyway.
3. CDC is abusing its FOIA redaction privilege. This classified email.

Turns out this was a big fat lie. Walensky was privately discussing breakthrough infections right at the start of the "vaccine" rollout January 2021.

(notice also that Covid origin fraudsters Collins and Fauci were er in this and then lied about it)

In the January 2021 email, Walensky clearly admits that the jabs weren't working as advertised (bolding mine):

I had a call with Francis Collins this morning and **one of the issues we discussed was that of vaccine breakthroughs.**

This is clearly an important area of study...

Yes, it was an important area of study, one which they neglected. For anyone who questioned the vaccines, however, they were quickly censored by Big Tech at the direction of the administration. Careers and reputations were destroyed. Meanwhile, Walensky was singing a different tune to the American people:

However, in public, Walensky was saying something quite different. Two months after discussing this data, she said vaccinated

...in a congressional hearing, after it became clear people were able to get infected with COVID even after receiving the vaccine, she defended her original statements by claiming it was true at the time she said it — namely, for the strands we were dealing with in early 2021.

We now know that was not true and that Walensky herself knew it was not true.

Dr. Houman Hemmati, a vocal critic of the governmental response to the pandemic, was disgusted:

I'm beyond the point of anger about this, Jay. At tl point, I'm sad — Sad that our great nation can be such deceptive and/or incompetent people who a entrusted with enormous power and then use it in ways. We can do better. We must do better. This is USA I... [Show more](#)

Turns out Walensky even knew about the breakthroughs weeks earlier:

Nancy and I discussed this briefly a few weeks ago and I understand [redacted.]

So did former Chief Medical Advisor to the White House and vaccine fanatic Dr. Anthony Fauci know? Yes:

Should we discuss? What is the best next step forward? **Francis is also discussing with Tony.**

Many of us knew early on that much of what we were being told by the Biden administration and Fibbin' Fauci simply was not true. We knew because we had eyes and brains. This latest email is just further proof that they were knowingly spreading misinformation the entire time.
