

Military Ray Gun • ADS Electromagnetic Radi...

Here's an infomercial about millimeter-wave ADS nonlethal weapons brought to you by your Tax Dollars. There have been concerns raised about whether the new 5G wireless network that's being rolled out could be weaponized into an ADS grid. We're going to do a little science lesson, comparing the radiation from ADS weapons, microwave ovens, WiFi, cell phones and SmartMeters to try to get to the bottom of this.

The difference in wavelength between the telecom's 38 GHz and the military's 95 GHz is not that great since all of this is in the 1-millimeter frequency band. What differentiates a weapon from a cell tower has to do with microwave density or power.

The Active Denial System (ADS) featured here works by firing a high-powered, focused, free-electron maser beam of 95 GHz waves at a target, which corresponds to a wavelength of 3.2 mm. The beam is produced by a gyrotron, a linear-beam vacuum tube which generates high-frequency electromagnetic radiation by stimulated cyclotron resonance of electrons moving through a strong magnetic field.

The action of the ADS millimeter wave energy beam is comparable to that of a microwave oven, in that it excites the water and fat molecules in the skin, instantly heating them. However, the short millimeter waves used in ADS penetrate only the top layers of skin, with most of the energy being absorbed within 0.4 mm (0.0156 inch), whereas microwaves, which use the much lower frequency (and longer wavelength) of 2.45 GHz can penetrate much deeper into human tissue to about 17 mm (0.67 inch).

The longer waves of a microwave oven can penetrate food (and human bodies) easily – and cook them, if the density is high enough. The microwaves used for WiFi routers are in the same range as microwave ovens but the density of their transmission is much lower. The health risks associated with WiFi are due to the microwave radiation being constant, with longer waves that can penetrate into the body and produce cellular changes over time. Cell phones and smart

deeper into the body than WiFi.

Because the frequencies used in 5G cannot travel long distances, the network requires more towers closer together. The proposed implementation of 5G in California will require 50,000 new cell towers, 100- to 300 meters apart.

The million-dollar question might seem to be: Could 5G cell tower transmissions be adjusted to send much more powerful beams of high density microwaves toward you or a crowd of people, such as is done with the ADS? The immediate answer is no, the standard antennas being used could not produce the microwave density of the military's ADS weapon without burning themselves up.

Still, very little is known about longterm exposure to the existing levels of radiation in the 28 GHz, 38 GHz or the 95 GHz range, especially when pulsed, as with SmartMeters. What is known is that microwave radiation from devices in the 900 MHz to 3 GHz frequency range can cause many symptoms of distress and illness in those who are electro-sensitive.

The real million-dollar question might then become: Can the existing and proposed wireless networks be used as carrier frequencies to induce brainwave entrainment in conjunction with the silent sound spread spectrum (SSSS)? **Another million dollar question might be whether or not the rampant SmartPhone addiction that we see isn't already a result of such brainwave entrainment?**

Dr. Ellis Evans at NaturalBlaze.com notes that the media is generally silent about such high-security issues but that during times of war, the braggadocio of the military can surface, as it did during the first war in Iraq on March 21, 1991, on the UK's ITV News Channel:

"An unbelievable and highly classified psy-ops program utilizing 'Silent Sound' techniques was successfully deployed. The opportunity to use this method occurred when Saddam Hussein's military command-and-control system was destroyed. **The Iraqi troops were then forced to use commercial FM radio**

frequency. The US psy-ops team set up its own portable FM transmitter, utilizing the same frequency, in the deserted city of Al Khafji. This US transmitter overpowered the local Iraqi station. Along with patriotic and religious music, psy-ops transmitted 'vague, confusing and contradictory military orders and information. Subliminally, a much more powerful technology was at work, however. A sophisticated electronic system designed to 'speak' directly to the mind of the listener; to alter and entrain his brainwaves, to manipulate his brain's electroencephalographic (EEG) patterns and thus artificially implant negative emotional states -- feelings of intense fear, anxiety, despair and hopelessness were created in the Iraqi troops. This incredibly effective subliminal system doesn't just tell a person to feel an emotion, it makes them feel it; it implants that emotion in their minds."

Over 200,000 battle-hardened Iraqi Republican Guards surrendered without a single shot being fired. Who's to say that this incredibly effective technology isn't being used elsewhere using different applications?

I will continue to study this subject and report back.

When any device finds a use, especially with the military/gov't....it will be used more than not for a destructive purpose. It may take years to finally figure out the 'kill ratio' but it will get done and then experimented upon animals first then humans. It will be under the guise of perhaps a university grant for 'humanitarian' use.....to alleviate pain, cure a cancer, touted to be of great benefit to mankind. It's been done and will always be done. I haven't heard of any 'real' punishment for victims of the horrendous experiments used against the mentally ill, PTSD victims, war veterans, people who come willingly to participate in programs for \$\$ and then suffer the after effects and are left to suffer on their own.

Smart meters are busily starting fires in buildings all across the country....making many extremely ill...and causing much mental damage. One has to be responsible for their own health & well being. Research & put into practice information to mitigate the effects that will occur. 5G is looming.....I can't imagine all the towers it will take to put this program into practice. What will a powerful tornado do to this system....if it's allowed to blow through an area that is set-up for it or a huge fire. Humans are in the petrie dish under the microscope. Very disposable but there are billions of us for fodder, we are literally entering the Twilight Zone.

This all is nothing more than a Luciferian/Satanist "Wet-Dream" that will NEVER happen, OR better known as "Fear-Porn"....UNDERSTAND???

Just research "Magnetic devices" and their MANY uses, and you will NOTHING to worry about Folks.

STOP using those "Mind-Control" wireless technologies like "Smart-Phones; Blue tooth", or if you must, make sure to ware "Magnetic" devices (I have them all over my place and on body CONSTANTLY.

Research the use of "Crystals" as protection too, and acquire as many as you can and post them all over your place and body.

The yahoo scientist Dr. Jose Delgado developing electronic mind control stated the following decades ago, very similar in purpose to the proposed method of artificial control that Pavlov was instructed to inflict upon the subjugated Russian people following the terrorist takeover by the Bolsheviks in 1917 after which 66 million Christians were genocided. Thank goodness Pavlov was disgusted by the idea of reducing the entire Russian gentile people to mere robots, but Delgado picked up where Trotsky and Lenin had not managed to persuade Pavlov.

"We need a program of psychosurgery for political control of our society. The purpose is physical control of the mind. Everyone who deviates from the given norm can be surgically mutilated.

"The individual may think that the most important reality is his own existence, but this is only his personal point of view. This lacks historical perspective.

"Man does not have the right to develop his own mind. This kind of liberal orientation has great appeal. We must electrically control the brain. Some day armies and generals will be controlled by electric stimulation of the brain."

This is how the draconian genocidal Noahide Laws, already approved and intended to be made law by the UN throughout the entire world, will be enforced, by mind-controlled NATO and UN armed troops in every nation in the entire world. Troops will suffer acute and unbearable

<https://cassiopaea.org/cass/delgado.htm>

Of course, they do say that gentiles were only created to serve the yahoos, 'like donkeys' as the late Rabbi Ovadia Yosef, erstwhile leader of the Sephardic Israeli Shas Party stated.
